Political Communications Legislations Infrastructure Governance

The central administration GovTechlab strategy has been defined and will be launched in the first semester of 2023. For the deployment of the GovTechLab, 27 million euros were allocated. One of the initiatives incorporated into the Govtech is the use of clear communication in the administration. A [decalogue of commitments](#) has recently been presented on promoting the use of clear language on public administration website.

On 29 March 2022, the plenary session of the Spanish Lower House of Parliament approved the [5G Cybersecurity Law](#), which establishes specific cybersecurity requirements for the roll out and operation of 5G network. The legislation identifies the main threats and vulnerabilities, the most sensitive assets and strategic risks in the roll out of 5G networks.

The Ministry of Economic Affairs and Digital Transformation has deployed a new app available to citizens on Android and IOS, My Citizen's folder. In the new version of [My Citizen's Folder](#), from the My Topics section, you will be able to consult the last year of your working life, the environmental badge of your vehicle/s as well as obtain proof of social benefits, its history and the degree of dependency.

No recent changes in governance have been reported to date.
